

CRUSH 'N' GO NORFOLK 07885 461498

Red Rhino 5000 Series Compact Crusher: Specifications & Details.

The Red Rhino 5000 series compact crusher is designed for the onsite crushing and recycling of construction and demolition waste into a reusable aggregate. This tracked compact crusher is a continual motion jaw crusher that can crush a full UK kerbstone in approximately 30 seconds. It is transportable on a standard plant trailer and ideal for sites with limited or restricted access and space. Self propelled, it weighs only 2.75t and can produce in excess of 80t per day.

Features

Simple visual controls & electric start

Hydraulic Jaw Adjustment

Large stand, non-slip

Rubber Tracks. Will climb a 30° incline and turn full circle on the spot.

Jaw Crusher: Manganese steel jaws

Engine: Deutz 37hp water cooled diesel

Technical Specifications

Length: 4,400 mm

Width: 1,660mm

Height: 1,950 mm

Weight: 2,940 Kg

Input Size: 500 mm x 250 mm

Output Size: Variable from 10mm up to 100mm - Instant Hydraulic Adjustment

Output: up to 15+ tons per hour

Consumption: 5.0 litres of diesel per hour

Dust Suppression: Domestic hose connect to fine water spray nozzles on conveyor

Conveyor Discharge Height: 1800 mm
